

Bicelles (Bilayered Mixed Micelles)

- 3:1 ratio Dimyristoylphosphatidylcholine (C_{14}) to Dihexanoylphosphatidylcholine (C_6)
- Coin-shaped (40 nm) and aligned with the magnetic field
- Can switch from isotropic ($< 27C$) to liquid crystal ($> 27C$)
- Degree of alignment proportional to lipid conc: 10^{-3} to 10^{-4}
