

## Frontiers in Science

**2012 Frontiers in Science will not be scheduled this year but is expected to return in 2013.**

If you are interested in majoring in chemistry or biochemistry, individual or small group visits may be arranged in advance. An ideal time to visit may be during the week of your Fall or Spring Break. For more information contact the Program Coordinator, Olivia A. Mendoza via email at [omendoza@email.arizona.edu](mailto:omendoza@email.arizona.edu) <sup>[1]</sup> or 520.621.3868.

**This event is for top students who plan to attend college and who are interested in careers in the frontiers of biological and chemical sciences and who plan to major in chemistry or biochemistry, or a closely related area.** This includes the health professions, research, business or law associated with chemistry, biochemistry, life sciences and biotechnology. Our aim is to inform potential students of the educational and career opportunities in the field of multiple sciences.
