

Bonner Denton and Ann Walker Named ACS Fellows

August 8, 2011

Congratulations to **Bonner Denton** and **Ann Walker**, who have been named **2011 ACS Fellows!**

The American Chemical Society bestowed this honor upon Professors Denton and Walker and 211 other distinguished scientists who have demonstrated outstanding accomplishments in chemistry and made important contributions to ACS, the world's largest scientific society. The 2011 Fellows will be recognized at an induction ceremony on Aug. 29 during the Society's 242nd National Meeting & Exposition in Denver.

"ACS is especially proud to honor these chemists during the 2011 International Year of Chemistry," said ACS President Nancy B. Jackson. "The work they are doing will improve all of our lives as they unleash the power of chemistry to solve global challenges like providing clean water, sufficient food, new energy sources and cures for disease. But that's not all. They're also organizing scientific conferences for their peers, doing outreach with scouts and schools, and being mentors to the next generation of scientists."

The ACS Fellows Program was created by the ACS Board of Directors in December 2008 "to recognize members of ACS for outstanding achievements in and contributions to Science, the Profession, and the Society." Fellows come from academe, industry and government.
