New Incoming Freshmen

If you will be a new freshman and interested in visiting the campus as part of **Frontiers in Science, a Chemistry and Biochemistry high school recruiting event**, please contact Olivia Mendoza. Details about the Frontiers in Science event can be found | [here](#) ^[1] |.

All prospective freshmen must apply to the UA through the | [Office of Admissions](#) ^[2] |. Prior to enrollment, you must attend a mandatory orientation session. During orientation you will meet your major advisor and enroll for classes.

New Transfers into BIOC or CHEM

Are you planning to **transfer from a community college or another University**? Check out the | [Transfer Center](#) ^[3] | for more information about applying to the University and the procedure once you are admitted.

If you are currently at an **Arizona community college** please check out our | [2+2 plans](#) ^[4] | to see what community college courses would best prepare you for our program.

Once you have applied, been accepted, and if necessary taken the Math Placement Test, you will need to schedule an appointment for **Orientation**. Orientation meetings are most effective if they are done in person. However, if you live outside the Tucson area, we can arrange for a phone or online orientation. All meetings are by appointment only, and you should plan on allotting a full hour to the meeting.

Contact an Academic Advisor (listed on the right)

If you are curious about our **program and student research opportunities**, you may want to visit the | [CBC Undergraduate Research Poster Fair](#) ^[5] |, which is open to the public each spring.

Current UA Students - Change/Add Major to BIOC or CHEM

You must **email the respective advisor (BIOC or CHEM) BEFORE coming in for advising**, which is by appointment only and not during priority registration.

Include in the subject line "New Major Meeting" and in the text please include your full name, your student ID, your current major, class standing and availability to meet for an appointment.
